

INVEST 60 SECONDS TO BAN ASBESTOS AND SAVE LIVES.

www.banasbestos.us

For more than a century, asbestos exposure had been linked to incurable diseases, yet asbestos has not been banned in the United States. Inhaling asbestos fibers can cause permanent and irreversible damage to vital organs. Doctors and scientists agree: *asbestos is a carcinogen and there is no safe level of exposure.*

We urge you to support legislation banning asbestos-containing products and fund educational and research programs by visiting our website www.banasbestos.us and clicking on “Write Your Congressman” and tell Congress to ban asbestos today.

Preventing asbestos exposure is the only way to eliminate asbestos caused diseases.

- 1** Email your U.S. Representatives today.
- 2** Circulate the action alert to your family, friends, medical team and co-workers.
- 3** **Donate today!**

TOGETHER, CHANGE IS POSSIBLE.
